

Four Point Contact Ball Bearing

SL 53-014-2T

Four Point Contact Ball Bearing
Seeding Machine

Technical Specification

a	Hexagonal bore	22.25 mm
d	Bore diameter	22.8 mm
D	Outside diameter	53.086 mm
B	Width inner ring	19.4 mm
C	Width outer ring	18.288 mm
α	Contact angle	25 °
kg	Mass	0.174 kg
C _{dyn}	Dynamic load rating	14 kN
C _o	Static load rating	7.8 kN
P _u	Fatigue load limit	0.328 kN

Sealing

D SEAL / D SEAL (2D)

The double lip seal provides twice as good a seal as the S seal, while the maximum permitted rotational speed is adequately lower, due to the greater friction of the rubber lips against the steel inner ring. However, this rotational speed may be higher than with a 3-lip seal, up to 1500rpm. The sheet metal part protects the seal from the soil, dust and rough particles. At the same time makes the labyrinth with the rubber part. The main area of application of bearings with such sealing are agricultural and construction machines at installation place where the rotational speed is up to 1500 rpm.
