LES 213 2F

Y-Bearing Plummer Block Units With Grey Cast Iron Housing "S"

FKLO

Technical Specification

d	Bore diameter	65 n	nm
L	Overall length	265 n	nm
A	Housing contact surface width	70 n	nm
A1	Width of the top of the housing	49 n	nm
Н	Housing height	150 m	nm
H1	Distance from the contact surface to the bearing axis	76.2 n	nm
H2	Housing foot thickness	27 n	nm
Jmin	Min. distance between the holes	193 n	nm
Jmax	Max. distance between the holes	213 n	nm
Ν	Diameter of attachment slot	25 n	nm
N1	Length of attachment slot	35 n	nm
s1	Distance from locking device side face to raceway centre	42.9 n	nm
kg	Mass	6.02 k	<g< td=""></g<>
Cdyn	Dynamic load rating	57.2 k	<n< td=""></n<>
Со	Static load rating	40 k	<n< td=""></n<>
Pu	Fatigue load limit	1.7 k	<n< td=""></n<>

F SEAL / F SEAL (2F)

Dual sealing, protection cover placed on the inner ring protects against rough impurity particles and makes the labyrinth with the sheet part of the seal; then the sealing S type,

with the labyrinth between the sheet part and the rubber lip that conducts the contact sealing. The friction and speeds are the same as with S but has much better protection against rough impurity particles. It is very good sealing system: the sheet part protects the seal from the soil, dust and rough particles. At the same time makes the labyrinth with the rubber part. The rubber part provides the contact sealing that prevents the penetration of the finer impurities, water, moisture, steam etc. Suitable for heavier conditions due to better protection against foreign matters. It is used with the Y bearings (standard).
